

# Flush Max Pro Door Care & Guarantee

## Care & Handling

Handle the Door unit carefully and check for any damage or manufacturing fault.

All painting and oiling should be done by professionals - Please see Painting Recommendation Page

## 10 Year Guarantee

Paraparaumu Doors & Joinery warrants the **Flush Max Pro door** for a period of **ten (10) years from the date of supply**.

### What is covered

This warranty covers defects arising from the **manufacture and assembly** of the Flush Max Pro door under normal residential use, including:

- Structural failure of the door leaf
- Delamination of the 6mm Tricoya® skins from the core
- Failure of joints or bonded components due to manufacturing fault
- Excessive or abnormal movement that renders the door inoperable

### What is not covered

This warranty does not cover:

- Paint, coating, or finishing failure of any kind
- Normal wear and tear
- Colour change, fading, surface marking, or checking
- Minor movement that does not affect door operation
- Damage caused by impact, abuse, or misuse
- Damage resulting from incorrect finishing, installation, or maintenance

### Finishing & painting requirements (critical condition)

This warranty applies **only if the Flush Max Pro door is finished in strict accordance with the Manufacturer's Painting & Finishing**

**Recommendations**, including but not limited to:

- The door must be **fully sealed and painted on all faces and edges** prior to or immediately after installation
- A **high-quality exterior paint system** must be used
- **Water-based acrylic exterior systems** are preferred
- **Dark colours are not permitted**
- One full coat of compatible **exterior primer/sealer** must be applied
- A minimum of **two full topcoats** must be applied
- All edges, lock cut-outs, hinge rebates, handle holes, and penetrations must be sealed
- No raw timber or panel edges are to remain exposed

Failure to comply with these requirements will void this warranty.

### Maintenance

The applied coating system must be maintained in good condition for the life of the door. Regular inspection and repainting as required are essential to long-term performance.

### Materials

Flush Max Pro doors incorporate Abodo timber components and Tricoya® engineered 6mm skins. These materials provide excellent durability and dimensional stability when correctly finished, installed, and maintained. This warranty relates to the Manufacturer's workmanship and assembly, not the separate warranties of material suppliers.
